

The works of brett nortje part 107.

Cure wounds.

Cure wounds is actually a divine spell listed by the x files, but, they will be where you get the help of spirits to do your bidding. if you were to have your hands held near the 'wound,' then you could heal the person by uploading the biological processes of the body, then we can easily channel energy from ourselves, guided by the spirits to heal the wound, yes?

The incantation for this would be;

"Αἴτό το πλάσμα ἐχει πλῖγοθεί , na me voĩthĩsei na epidiorthósei to sóma tous parakaló , páрте тἷn ἐnéρgeiá mou , an thélete, den boró na plĩrósun ta télĩ sas ."

The energy should go from you to the spirits to the wound, as you will control the energy and instructions, and then they will do the rest, yes?

Cure disease.

If you have uploaded all the specifics of diseases, then yo can cure diseases by knowing how they work. if you were to focus instructions and energy to the spirits, they can cure the disease, of course.

The chant for this should be;

"Αfairéste тἷ lásπἷ από αἴτό το sóma , den derve na klaíei , xéro pós leitourgeí , parakaló na me voĩthĩsei , teliká αἴτό cature tha petháneĩ !"

That should do it!

Purify water.

This will be where we can drink contaminated water, or, even sea water. of course, we will need to understand fully what we are trying to do, so read up on how to purify water with chemicals, then imagine the chemicals coming out of the air into the water, penetrating it and purifying it, yes?

The incantation for this will be;

"Katharíste αἴτό το neró , na eínai katharó , peinasména stómata gia na antéxeĩ ."

Detect evil.

If we were to want to know if someone is good or bad, as seen by the spirits, they will not be able to look int your eyes properly, as they will feel their place in society is at risk if they were to do something wrong, of course. no spirits like evil people really, unless bound to them. this 'spell' will reveal to you,

emotionally, the attitudes of others that are near you in the flesh, yes?

The command for this should be;

"Pes mou ta oinopneumatódj potá , apó tñ manséta , échei aftó to prósopo pou álloi agapoún ? an to kánoun , epitrépste mou na xérō , an den to kánoun na mou déixeí !"

Regeneration.

This regeneration will be where you ask the faeries to focus your own energy into the air with voice commands to the spirits, knowing how cells divide is all that is required, of course, and the incantation, being;

"Recvoer gia ména thnītós kélyfos mou , an borō na chásoun se perifrónjsi egó katoikó ."

If you were to examine all the recent spells, you will notice they are all very simple, yes? if you were to observe that all the things out there are spirits or faeries, then you will know too that they can help do things for you and you can help them.

If you are trying to do something bigger in future, do not make them promises, what can you o for them?

Instead give in to them! if they tell you to drop your pants and wee on a tree in the middle of the park, why not? giving in to them will amuse them, as they are all like children, of course. this is called banking, and it should be true, as, if you were to 'win them over,' then they will be ready to help you in the future.

Things they might ask you to do is like cheating on a girlfriend, chatting up a man you want, planting trees or watering the garden, cooking meals for the family, being a servant they find very funny, having the right sort of attitude - a servant for fun, a child or maternal person because you want to? and other things to do with being moral, basically, but, at the same time, not serious unless you are serious on yourself too!

Bless.

If we were to bless a firing squad, they would be more likely to hit the target than normally. i think this affects as much as how much you bless by as many people, yes?

To do this, you need to know how hand eye coordination works, and then also how to grant randomized flinches that find the target, so, knowing programming would help! if you were to know how to program something mathematically, or even normal maths with geometry, then you could quickly use your imagination on how to 'aim' better, yes?

The incantation for this would be;

"Skótose ton echthró mou tīn kardiá tous perásei , egó tha káno tīn epómeni apergía mou alítheia ."

So, now we can count on hitting the target the more we 'focus' on the target. faeries will guide us in our attacks and such, and, make us more acute to angles, yes?

Emotional blood lust and warrior focus.

Blood lust will be where the soldier or agent will seek to do as much damage as possible with little regard for the consequences, upping their lethality and focus to stop the 'perpetrator.' this will be where we gain the 'fight' gene working for us, and fear letting someone come up for a second chance, yes?

The enchantment for this would be;

"Ántlisi mésa stis fléves mas kánei tīn estíasi kai o fóvos , tha odigithoún éxo san áxona éna dóry ."

Now, many faeries like to have fun, and some faeries like to maim people. they have somethign against killing them for us, but will help us to kill, of course.

Sanctuary.

This will protect the person casting the spell by shielding them as long as they 'concentrate.' if they were to observe that the spirits can deny people the ability to attack them, then they must also not attack. the more you use this spell, the better it gets, as with all spells, of course!

The incantation is;

"Sas enochleí gia mia akómī forá na sas proséfchomai , as ólo to thymó apó to perivállon ton adéspoton mou . Pros eména í apó ména den échei simasía , Xéro óti i zoí mou éinai óla ta píra !"

Remember to focus on the things you want to be protected from - it is like buying time, of course.
